

- Have you suffered from a brain injury or stroke?
- Is your knee “stiff” when you are walking?
- Are you tripping or catching your toe when you are walking?

If you (or someone you know) answered yes to these questions, ***you may be eligible to participate in a research study!***

Participate in a Medical Research Study

The Motion Analysis Center at Mary Free Bed Rehabilitation Hospital is conducting a medical research study on individuals who have suffered brain injury or stroke. The study will look at a certain treatment to improve walking in people (ages 18 – 80 years old) who have a “stiff-knee”.

What's involved?

- It is absolutely **FREE** to participate
- One visit to the Motion Analysis Center for physical exam and computerized walking test
- One visit to a doctor's office to receive treatment
- Two more visits to the Motion Analysis Center for follow-up exams and computerized walking test
- Compensation for travel
