SPECTRUM HEALTH 

This year's symposium brings together an expert interdisciplinary faculty presenting topics related to the treatment and management of life-changing acquired brain injury (ABI). The event will address the state of science related to clinical, medical, psychosocial, educational and ethical considerations resulting from ABI, from the patient and family perspective.

Target Audience

Case Managers, Nurses, Nurse Practitioners, Occupational Therapists, Physical Therapists, Physicians, Psychologists, Rehab Program Administrators, Social Workers, Speech Language Pathologists, Students, Therapeutic Recreation Specialists, Brain Injury Survivors and Family Members.

Outcomes

Attendees will be able to recognize and best manage post-TBI sleep disturbances. Attendees also will be able to provide pertinent and sensitive educational information to families based on the patient's stage of recovery. Those in attendance will gain knowledge on current research related to children and TBI, the long-term outcomes and best practices. Ethical considerations and implications also will be explored, from the ICU to long-term residential care.

Collaborators

- Hope Network Neuro Rehabilitation
- Mary Free Bed Rehabilitation Hospital
- Spectrum Health Neuro Rehabilitation

The network provides comprehensive, coordinated rehabilitation services to people with brain injuries. These three organizations, each highly experienced in brain injury rehabilitation, have differentiated areas of specialty and together are capable of serving people with brain injuries at any stage in their recovery process. One of the network's purposes is to assist with the continuing education of professionals working with people who have sustained brain injuries. The objective of the annual symposium is to provide in-depth knowledge of best practices, research and ideas shaping the delivery of brain injury rehabilitation services.
