

INPATIENT REHABILITATION DOCUMENTATION

SET YOUR RECORDS STRAIGHT.

DOCUMENTATION

Getting back to basics builds a solid foundation for future performance. If you want to improve documentation, avoid denials and ensure your clinicians are charting efficiently and effectively, you'll be interested in these offerings.

MEDICAL NECESSITY ANALYSIS

We analyze rehabilitation documentation to ensure your team is meeting medical necessity requirements. We identify strengths and weaknesses before external regulatory agencies do.

PHYSICIAN EDUCATION

Our physician modules detail what content is required to support medical necessity to avoid payment and technical denials. These are especially helpful for

new physicians and when you need to implement processes to minimize documentation risks. On-site and 1:1 physician education is available.

INTERDISCIPLINARY EDUCATION

A team that's coordinated, collaborative and efficient will drive outcome performance, help your program achieve length-of-stay targets and outperform your competition. Modules are available on multiple topics, including medical necessity documentation for your therapists, nurses and case managers. You choose whether remote live webinars or on-site training is best for your team.

AUDITS AND APPEALS

Don't struggle, call us right away if you're faced with an unexpected audit or payment denial. We provide the framework and structure for appeals.
