

SKILLED NURSING FACILITY SERVICES

Because we understand that every rehabilitation program is unique, the Mary Free Bed Advisory Group partners with your team to customize services to address specific challenges.

REIMBURSEMENT

If the new Patient Driven Payment Model (PDPM) is impacting service delivery, we can help. We provide services to ensure your program efficiently delivers quality care.

- **Selecting short-stay admissions**

We work with your admissions team to evaluate the most appropriate referrals for your programs. Our proven care pathways smooth the transition of patients to you.

- **Documentation**

If you're struggling to capture the clinical complexity of those you serve, we can help. Our PDPM experts collaborate with your team to adequately document acuity to support Minimum Data Set (MDS) requirements and ensure assessments are completed in a timely and accurate manner.

QUALITY REPORTING PROGRAM MEASURES EDUCATION

Now more than ever, public reporting underscores the importance of accurately coding every item. We offer education on coding Quality Reporting Program (QRP) items for therapists and nurses.

- **Quality and Outcome Tracking**

We work with your team to analyze your program's key performance metrics. Based on your unique circumstances, we'll collaborate with your team to create understandable, facility-specific quality and outcome reporting strategies. This process simplifies and focuses reporting of meaningful data to QAPI committees and can be trended for improvement plans.

MDS COORDINATION

We offer in-depth analysis of your Minimum Data Set (MDS) and identify opportunities for improvement. Choose from these services:

- **MDS Coordinator Training**

Do you have a new MDS coordinator? Our 1:1 education program supports compliance with preferred standards of practice.

THERAPY UTILIZATION

We have experts in therapy productivity who can help you provide high-quality and efficient rehabilitation. We complete a comprehensive productivity assessment, analyze the information and help you develop action plans for improvement. We can even help with the implementation process.

CARE TRANSITIONS

If your team members work closely with acute care clinicians and other post-acute providers but struggle to efficiently transition patients to the next care level, give us a call. We offer programs on length-of-stay management, bundle payments, initial- and continued-stay authorizations and readmission reduction.

NEW PROGRAMS AND PROGRAM DEVELOPMENT

Are you considering opening a new program or expanding existing services? We'd be honored to work with you, from planning through construction to program opening. We also collaborate on space planning, equipment purchasing and program development.

SURVEY PREPARATION

Are you in the window for a state or Center for Medicare & Medicaid Services survey? We assist with preparation as well as post-survey action planning and implementation.

FLEXIBLE ENGAGEMENTS

We provide our services in a variety of ways based on what's convenient for you.

- **In Person**

We find it's beneficial to meet in person during the initial stages of our relationship. In addition to working at your organization, we'd love to host you at Mary Free Bed, so you can see examples of what we've implemented.

- **On-Site Lunch and Learns**

You provide the lunch, we provide the education for your team. We offer general modules on rehabilitation topics, or we customize program content to meet your unique needs. Testing is available for many of the courses.

- **Remote Live Webinars**

Tailored webinars are available at a time and place convenient for your team.

Do you have a unique need not mentioned here?
Just give us a call, and we'll be happy to create a customized service for you.
