

GREAT MINDS HEAL ALIKE.

The Mary Free Bed Rehabilitation System, established in 2011, is a collaborative alliance of hospitals and health care providers dedicated to enhancing patient access, care quality and clinical outcomes in rehabilitation services. By implementing educational initiatives, specialized admission procedures and standardized protocols, the system ensures that patients receive timely and appropriate levels of care tailored to their specific needs. This alliance aims to streamline the rehabilitation process, ultimately improving the overall patient experience and recovery outcomes.

The Mary Free Bed Rehabilitation System is an alliance of more than three dozen acute care hospitals across Michigan, Illinois, Indiana, West Virginia and Virginia.
