

INPATIENT PEDIATRIC OUTCOMES

Service Dates: April 1, 2025–March 31, 2026

Mary Free Bed 

Striving for Excellence

Progress looks different for every child, and that's worth celebrating! Throughout their inpatient rehabilitation stay, kids and families partner with our team to build strength, confidence and independence. These outcomes tell stories of hard work, resilience and courage that make every journey extraordinary.

INPATIENT PEDIATRIC OUTCOMES

Service Dates: April 1, 2025–March 31, 2026

Mary Free Bed 

Hospital Transfers

We're ready to care for kids with a variety of different needs! When additional medical tests or specialties are required, we'll arrange for temporary transfer to our local children's hospital (located half a mile away), with a quick return to rehabilitation when they're ready.

Patient Satisfaction

Mary Free Bed patients and families consistently report high satisfaction with the care and support they receive during their time with us.

*Based on Press Ganey Outpatient Rehab Likelihood to Recommend average score.

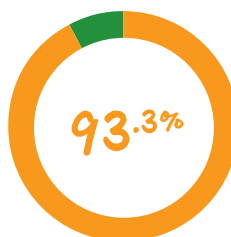

Average Length of Stay

At Mary Free Bed, kids get better faster. Pediatric patients go home an average of six days sooner—and at a higher functional level—than the national average.

Cheering You On¹

90 days after graduation, we follow up with kids and their families to talk about what's next.

PHYSICAL ABILITY

93.3% shared their physical abilities stayed the same or continued to improve after graduation.

HEALTH STATUS

100% shared they maintained or improved their health status since graduation.
